Press release 2

BioForum 2010 – by now more than 50 innovative R&D projects !

There is still more than 4 months till the event starts and already more than 50 new R&D projects from the countries of Central Europe are business partners to BioForum 2010. In addition to Polish participants, in 2010 BioForum number of projects from Hungary, Lithuania, Latvia, Estonia and Czech Republic to be presented. Innovative ideas will be presented by biotechnology researchers.

The subjects extends from the active substances, potential anticancer agents to the bioengineering of the environment. The event scopes at most current topics - a new therapeutic substances and bionanotechnology. Projects are presented by teams originated from universities, research institutes and companies.

Face-to-face meetings with potential scientific / business partners will be facilitated by a special **BioPartnering** system. The verified formula for establishing business contacts is a guarantee of success, and tangible benefits for companies, partners from science and business from Poland and Central European Region.

Cooperation with Adamed Ltd., that was established during BioForum was applied into research to develop chemistry of carrier-kinase inhibitor conjugates. Independently, the technology of removing endotoxins from bacteriophage preparations was developed. In short - open form BioForum - the biggest event of BioTech and BioBusiness – is crucial for bringing together the scientific and business communities of the sector - said prof. PhD. Janusz Boratyński, director of the laboratory of Biomedical Chemistry, Institute of Immunology and Experimental Therapy in Wrocław.

BioForum 2010 – Central European BioBusiness Forum of Biotechnology will be held in 19-21 May, 2010 in Lodz, Poland. First of all, BioForum creates a chance for Region of playing an important part as a source of an innovative biotechnologies. On the other hand this event is an opportunity for a biobusiness world leaders to search for a new products and cooperation in CE Region.
