

Overview of biotechnology potential in Central Europe BioForum 2010

Issues related to the condition of biotechnology in the countries of Central Europe, not only absorb the scientific community, but also investment firms and individuals thinking about setting up of new biotech companies. One of the main panels of the program is to review the potential of biotechnology in the Countries of Central Europe (**Overview of biotechnology potential in CE**). One of the countries directly involved in this panel are Hungary, whose representatives will share with participants their knowledge and experience. A key representative of biosector in this country is Hungarian Biotechnology Association.

*In their presentation, the Hungarian Biotechnology Association will give a general overview of the Hungarian biotechnology industry including among others the major sectors, areas of activity, R&D and investment outlook, highlighting the business climate, regulations and policies. The lecture will illustrate, using comparative tools, the position occupied by the country on the international biotech market. Last but not the least it will pinpoint the key factors that provide the basis for Hungary becoming one of the leading countries in biotechnology in the Central Europe region – said **Monika Jankovics, Project Manager at the Hungarian Biotechnology Association.***

Monika Jankovics is a Project Manager at the Hungarian Biotechnology Association. She received her Diploma (M.Sc.) in English Language and Literature in 2005 at the University of Szeged. Her current tasks are preparation and management of national and international grant proposals and projects, organizing various events and conferences, administration, communication and coordination of matters involving the interest of the Association.
