Polpharma Biologics recruits to its' R&D Department

The Biotechnology Department of Polpharma has announced to play an active role in BioForum 2011 – The Central European Forum of Biotechnology and Innovative BioEconomy, which will take place on 11-12th May..

This will be the second edition of BioForum with the participation of Polpharma. In 2010 the company participated in the event as one of the main partners, and this year during the 10th anniversary edition Polpharma, by the participation of Polpharma Biologics, the company will be more active than ever before.

During BioForum a special meeting place will be arranged for Polpharma Biologics – the Private Meeting Room. In the meeting room over 30 BioPartnering B2B meetings will take place, during which the BioPartnering participants will have the opportunity to present their offers and collaboration propositions, which will concern various fields of R&D.

Polpharma Biologics seeks employees to its' new R&D hub in Gdansk (Poland). During BioForum, a recruitment action will be launched. In a recruitment corner, graduates of biotechnology, biology and similar specializations will have the opportunity to leave their contact data and discuss employment possibilities with Polpharma representatives. The BioForum trade fair will form a cooperation platform between PB and talented, creative young people. A direct interview with the company will be possible for participants determined to get the job.

Polpharma is the biggest Polish drug and pharmaceutical substance manufacturer. It has been working to become the leader and earn its' customers trust for 75 years, providing products of the highest quality, supporting development in Polish Science and leading pro-health and educational campaigns – all this under the motto „People help people”. The company specializes in cardiology, neurology and gastroenterology prescription and hospital use drugs. Apart from that Polpharma produces many OTC drugs. Currently the company is making massive investments in the development of new biotechnology drugs – innovative and bioequivalent alike.
